

IMMISSIO 40 Concrete Washbasin

Concrete is an extremely durable material. Concrete however, can stain or scratch or break if not used with care. It behaves like marble, ceramic or stone. The material we use to manufacture our products is a kind of GFRC (glass fiber reinforced concrete). This is a sophisticated unique mixture of cement, additives, and conditioners aggregates, reinforced with fiber glass which in combination with the four-step sealing process, ensures the highest quality score. The highest quality sealant system we use, provides the most effective tightness while retaining the natural appearance of concrete.

Dimension: 38x38cm Height: 16cm Weight: 18kg

Please follow the instructions below to ensure the best possible maintenance of the product you selected.

Liquids with coloring should be swept and removed with plenty of water before dry. Be careful that no acids, or solvents, come into contact with the surface. If so, it should be removed immediately with plenty of water.

Concrete surfaces should not be rubbed with sharp objects, such as metal or wire.

Avoid impact from heavy objects directly onto the concrete surface.

We suggest cleaning, lukewarm water with a mild detergent neutral when required, using soft vettex cloths, you can use liquid soaps from Marseille. Avoid the usage of very hot water.
